

OneWave

OneWave Outdoor Water Purification System

Outdoor water bodies such as swimming pools, spas, and decorative water features play a significant role in enhancing our leisure and recreational experiences.

However, ensuring the cleanliness and purity of these outdoor water environments is paramount to safeguarding the health and well-being of users.

In this regard, the [OneWave Outdoor Water Purification System](#) emerges as a beacon of innovation, offering a comprehensive solution to effectively treat and maintain the quality of outdoor water bodies.

Why choose OneWave Outdoor Water Purification System?

Effective Filtration

A sand filter removes dirt and impurities, ensuring clean, transparent water by capturing particles as water passes through the sand bed.

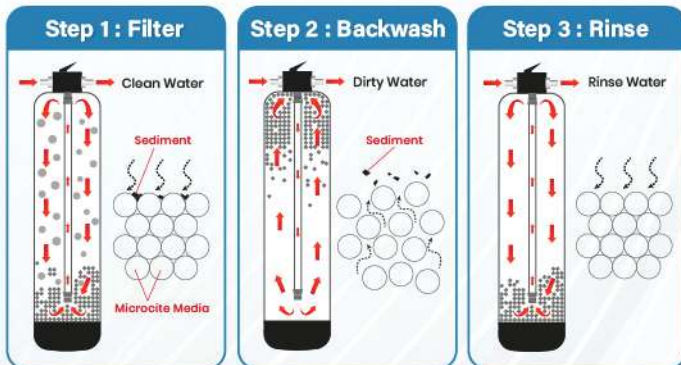

Reliability

The OneWave system ensures reliable, stable, and clean water for outdoor environments like pools, spas, and water features.

Ease of Operation

Designed for simplicity, the system suits various outdoor water applications and is easy to manage and maintain for long-term stability.

Specification

OWS300-S

Size	: 10" (Diameter) x 42"(H)
Operational Pressure	: Max 3-5 Bars
Weight	: 54Kg
Filtration Type	: 6 Layers Filter Filtration
Body Material	: Stainless Steel
Operation	: Manual Self Backlash

OWS300-F

Size	: 10" (Diameter) x 44"(H)
Operational Pressure	: Max 3-5 Bars
Weight	: 43Kg
Filtration Type	: 6 Layers Filter Filtration
Body Material	: Reinforced Fiber (FRP)
Operation	: Manual Self Backlash
